Baraclude (entecavir)

Override(s)	Approval Duration
Prior Authorization Quantity Limits	1 year

Medications	Quantity Limit
Baraclude (entecavir)	May be subject to quantity limit

APPROVAL CRITERIA

Requests for Baraclude (entecavir) may be approved for individuals who meet the following criteria:

- I. Individual is 2 years of age or older; **AND**
- II. Individual has a diagnosis of chronic Hepatitis B infection; **AND**
- III. Individual has not been previously treated with lamivudine (AASLD 2018);

OR

- IV. Individual is using as prophylaxis for hepatitis B reactivation in the setting of immune suppression (AGA 2015) or in combination with hepatitis C direct-acting antiviral therapy (AASLD 2018);

OR

- V. Individual is a solid organ transplant recipient and using as prophylaxis for hepatitis B reactivation (AASLD 2018).

Note: Baraclude (entecavir) has black box warnings for severe exacerbations of Hepatitis B, co-infection of HIV and HBV, lactic acidosis, and severe hepatomegaly with steatosis. Hepatic function should be monitored for several months after discontinuation of therapy to assess for severe exacerbation of hepatitis. Therapy for individuals co-infected with HBV and HIV should also include a HAART regimen to avoid potential development of nucleoside reverse transcriptase inhibitors (NRTI) resistance.
