

REMINDER: Claim Recoupment

Effective March 25, 2011, any ordering, referring, or prescribing provider's National Provider Identifier (NPI) indicated on a claim must not be terminated for cause by any State Medicaid Agency or revoked for cause by Medicare; sanctioned; or excluded. Although the Kansas Medical Assistance Program (KMAP) did not make submission of the ordering, referring, or prescribing NPI mandatory until October 3, 2014, the rule was effective on March 25, 2011. This rule allows State Medicaid Agencies to recoup such claims if the ordering, referring, or prescribing provider was terminated, revoked, sanctioned, or excluded on the claim date of service.

Fee-for-service (FFS) recoveries will be performed by the fiscal agent; KanCare recoveries will be performed by the appropriate managed care organization (MCO).
