

Provider Update

Our New Online Provider Directory: Built for Providers *and* Members

Update: We launched our newly designed online provider directory in September. [Try it out here.](#)

✦ **What this means to you:** The provider directory isn't just for members! Our new tool has several features to help you make referrals and otherwise coordinate our members' care, as well as attract more members to you.

Put our new online provider directory to work for you.

Our provider directories are a go-to resource for members, but we've redesigned them with you in mind, too. How will this new tool benefit you?

- **Enhanced profiles** with more relevant information, including additional locations and accreditations, make you more appealing and show you are able to care for a wider population
- **Detailed location information**, including maps and directions to your office and available public transit options, makes it easier for members to find you and get to their appointments on time; also helps you refer members to doctors they can easily access
- **New search and compare functions**, including the ability to compare up to three providers at once and create custom directories to print or email, help you make informed referrals and save your results for future use
