

Important information regarding coverage

To support your efforts in preventing preterm delivery in high-risk pregnant women, Amerigroup offers a program to ensure physicians are aware of members who may benefit from progestin therapies. You will receive a provider fax alert listing members on your panel identified through our high-risk screening survey as potential candidates for progestin therapy. This is an optional service, and you may request to discontinue receiving these alerts at any time.

If you wish to prescribe progestin therapy to your patients, the following delivery and administration options are available:

1. For Makena, please call Provider Services at 1-800-454-3730 to initiate a precertification request.
2. If home health services are required for administration, please contact Alere Home Health at 1-800-999-2106 or by fax at 866-252-4293 to complete a referral.

If you have questions about the program or wish to opt out of provider alerts for progestin therapy, please call Provider Services at 1-800-454-3730 or an Amerigroup OB case manager at 410-859-5800.

We hope you find this communication helpful. Thank you for all you do to keep our members healthy.
