

HEDIS^{®*} Immunization and Lead Screening

*HEDIS is a registered trademark of the National Committee for Quality Assurance (NCQA).

Childhood Immunization Status (CIS)

Percentage of children 2 years of age who have had all of the required immunizations

Documentation must include the following:

4 DTaP	3 IPV
3 HIB	3 HEP B
1 MMR	4 Pneumococcal (PCV)
1 HEP A	2 Influenza
2 or 3 Rotavirus/RV Rotarix = 2 doses Rota Teq = 3 doses	1 VZV or has had chickenpox

Common chart deficiencies:

- Immunizations received after the second birthday
- PCP charts do not contain immunization records if received elsewhere
 - Health departments
 - Immunizations that are given in the hospital at birth
- No documentation of contraindications or allergies

Lead Screening in Children (LSC)

The percentage of children 2 years of age who have had one or more capillary or venous lead blood tests for lead poisoning by their second birthday

Documentation must include both of the following:

- A note indicating the date the test was performed
- The result or finding

Common chart deficiencies:

- Lead assessment does not constitute a lead screening

Immunizations for Adolescents (IMA)

Adolescent members turning 13 in the measurement year who have had these required immunizations

Documentation must include:

- Meningococcal – one dose on or between 11th and 13th birthdays
- DTaP – one dose on or between 10th and 13th birthdays
- Human Papillomavirus (HPV) – three doses by their 13th birthday

Common chart deficiencies:

- Immunizations not administered during appropriate time frames
- PCP charts do not contain immunization records if received elsewhere, e.g., health departments

If missing any immunizations, please include the following:

- Documentation of parental refusal
- Documentation of request for delayed immunization schedules
- Immunizations given at health departments
- Immunizations given in the hospital at birth
- Documentation of contraindications or allergies
