## CCS —

### Cervical Cancer Screening

Female individuals 24-64 during the measurement time frame (measurement year and two years prior) who had a cervical cancer screening or

Female individuals ages 35-64 who had a cervical cancer screening and HPV test co-testing (measurement year and four years prior)

#### Documentation must include one of the following:

- Date and result of cervical cancer screening test
- Date and result of cervical cancer screening test and date of HPV test on the same date of service
- Evidence of hysterectomy with no residual cervix

#### Common chart deficiencies:

- Lack of documentation related to women's health in PCP charts
- Incomplete documentation related to hysterectomy HPV tests ordered
- HPV tests ordered due to positive Pap tests do not count

## BCS —

### Breast Cancer Screening

Female individuals 50-74 during the measurement time frame (October 1 two years prior to the measurement year through December 31 of the measurement year)

#### Documentation for the BCS measure must include:

- The date the mammogram was performed and the results. Evidence of a mastectomy may exclude the member from the measure.

## PPC —

### Prenatal and Postpartum Care

Female individuals who delivered a live birth between November 6 of the prior year and November 5 of the measurement year

#### Documentation must include:

- Prenatal care: prenatal visit within 42 days of enrollment or during the first trimester (Most of this information is found on the ACOG sheets.)
- Postpartum care: postpartum visit within 21-56 days of delivery

#### Common chart deficiencies:

- Incision check for post C-section does not constitute a postpartum visit.

## CHL —

### Chlamydia Screening in Women

Female individuals 16-24 identified through claim/encounter or pharmacy data as being sexually active who had at least one test for chlamydia during the measurement year

#### Claim/encounter data would include:

- Pregnancy or pregnancy test.
- Sexual activity indication code.

#### Pharmacy data:

- Prescriptions for contraception

#### Documentation for the CHL measure must include:

- The date the test was performed and the results.
