Formal psychological testing is neither clinically indicated for routine screening or assessment of behavioral health disorders, nor is psychological testing indicated for the administration of brief behavior rating scales and inventories. Such scales and inventories are an expected part of a routine and complete diagnostic process. Other than in exceptional cases, a diagnostic interview and relevant rating scales should be completed by the psychologist prior to submission of requests for psychological testing authorization. Requests for placement purposes and forensic purposes are not covered benefits. Requests for educational testing or learning disabilities assessment for educational purposes should be referred to the public school system.
