## Improve Member's Medication Adherence with 90-Day Prescriptions

To help improve medication adherence among Amerigroup\* Community Care individual and group-sponsored Medicare Advantage members, Amerigroup will fax providers prescribing a 30-day supply of oral diabetic medications, RAS antagonists and statins to promote the use of 90-day prescriptions. Ninety-day prescriptions help improve the adherence of our Medicare Advantage members by having them travel to their pharmacy less often. When medically appropriate, we request that you convert the member's prescription to a 90-day supply to improve patient adherence and outcomes without compromising the quality of care. Please note that we do *not* intend to transfer these prescriptions to a mail-order or specialty pharmacy. The member will obtain the 90-day supply medication at the same pharmacy where he or she previously obtained the 30-day supply prescription.
