**Frequently asked questions**

- 1. Are there free prenatal education classes or breastfeeding classes available?**

Most local KS WIC departments offer free breastfeeding classes and support. Certain locations across the state have a free March of Dimes, Becoming a Mom program for prenatal education. Stormont Vail in Topeka also provides free breastfeeding education and support as beginning August 2015. Amerigroup offers a Warm Health telephonic/web/app system to provide weekly communication with prenatal and postpartum education for members. Please contact member services at 1-877-434-7579 and ask for a Kansas plan obstetrics registered nurse (OB RN) case manager for assistance to enroll a member in the program.

**2. How does the member obtain a breast pump?**

The member must obtain a prescription for a breast pump from their OB provider and contact an Amerigroup contracted durable medical equipment (DME) provider to obtain a pump (refer to the provider search engine or O:\Shared\Kansas\HCMS\PH\OB CM\OB CM Resources.) If a member prefers the pump to be shipped directly to their residence, please contact EdgePark DME at 1-800-321-0591.

**3. Any additional resources in Kansas for breastfeeding support?**

Members may contact the Kansas La Leche League during pregnancy or after delivery of infant for breastfeeding support – [kansaslll.org](http://kansaslll.org). After delivery of infant, many hospitals across the state have walk-in breastfeeding clinics staffed with international board lactation consultants (IBLCs) or RNs to assist with breastfeeding. Please check with your delivering hospital for availability.

If additional information or referrals are needed regarding any of this information, please contact Amerigroup Kansas, Inc. at 1-877-434-7579 and ask to speak with a Kansas OB RN case manager. Currently, Amerigroup has four dedicated OB nurses who are available Monday through Friday, 8 a.m. – 5 p.m. to answer antepartum/postpartum questions and to assist with appropriate referrals across the state. These nurses are available to case manage high risk OB members and provide the extra support and education for members and help coordinate care with their OB providers.
