

Amerigroup Community Care Provider Incentive Program: Providers can earn more money

Amerigroup is excited to announce we have added new measures to our existing Provider Incentive Program (PIP), effective July 1, 2019. The Division of Medical Assistance and Health Services continues to invest in physician rates for the state fiscal year 2020 (ending June 30, 2020), and Amerigroup will continue to distribute these Medicaid funds through the PIP. The additional measures are related to member engagement, additional preventive care and hypertension. Existing measures related to general wellness, women's health and basic diabetes care still apply. We encourage you to take advantage of our robust program. For more information or assistance, contact your local Provider Relations representative or call Provider Services at 1-800-454-3730.
