

Individualized High-Risk Patient Management

Amerigroup Amerivantage (Medicare Advantage) care coordination available for Medicare Advantage members who are admitted to skilled nursing facilities

Amerigroup is teaming up with our vendors to provide individualized high-risk patient management services for Amerivantage Medicare Advantage members. An interdisciplinary team of case managers, social workers, nurse practitioners and physicians will work with the member and family to help ensure the member has a safe discharge and understands what he or she should do to prevent an unnecessary readmission to the hospital. The member also may receive ongoing care management.

Members will be strongly advised to follow up with their primary care physicians. Amerigroup has engaged this vendor/these vendors to ease the transition from hospital to skilled nursing facility or home for both the member and the physician who is caring for the member.

Amerivantage is an HMO plan with a Medicare contract and a contract with the New Jersey Medicaid program. Enrollment in Amerivantage depends on contract renewal.
