**Amerigroup Amerivantage (Medicare Advantage) webinar for all imaging providers:
Learn how to complete the American Imaging Management OptiNET imaging services registration**

Amerigroup Community Care is collecting information about the imaging capabilities of all Amerigroup Amerivantage (Medicare Advantage) contracted providers who provide the technical component of a number of outpatient diagnostic imaging services for our individual Amerivantage members.

American Imaging Management's (AIM) online registration tool, OptiNet[®], will collect modality-specific data from providers who render X-ray, ultrasound, magnetic resonance (MR), computed tomography (CT), nuclear medicine (NUC), positron emission tomography (PET) and echocardiograph imaging services in areas such as: Facility qualifications, technician and physician qualifications, accreditation, equipment and technical registration.

This data will be used to calculate site scores for providers who render imaging services to our individual Amerivantage members. **All participating providers who provide imaging services, including X-rays and ultrasounds, should complete the registration.**

Providers who score less than 76 or who do not complete the survey by June 1, 2016, will receive a line-item denial for the technical component of the outpatient diagnostic imaging service only.

Amerigroup strongly encourages any provider who scores below 76 to improve their site score for the applicable modality before the line item denial of claims for dates of service on or after June 1, 2016. Providers who have not registered and therefore have no score will also be subject to line-item denials for claims submitted for dates of service on or after June 1, 2016.

Attend one of the webinars below to learn how to perform the following tasks:

- Access the OptiNet assessment
- Copy previously completed OptiNet assessments to your Amerivantage account
- Complete a new AIM OptiNet registration
- Interpret and improve your site score
