Flu Vaccinations

We appreciate the quality care you provide to our members. Protect yourself and your patients. Help reduce the incidence and spread of flu by encouraging patients to get vaccinated. The flu vaccine can help patients who are at a greater risk of getting seriously ill from the flu such as older adults, children, and those individuals with chronic health conditions. Vaccinations may be available and covered for members at a variety of retail locations. Members can call Member Services on the back of their medical card for in-network retailers such as Rite-Aid, Walgreens, CVS, and many others offering the flu vaccine this season.
