## HealthMap Solutions Gathering Diabetes Screening Results

HealthMap Solutions, a laboratory test result data aggregator, is gathering Hemoglobin A1c and nephropathy screening results for Amerigroup Community Care Medicare Advantage diabetic members in Tennessee.

HealthMap Solutions will transmit the screening results to Amerigroup to help us determine if our Medicare Advantage members diagnosed with diabetes have completed these diabetic screenings. The screening information will be included in Amerigroup's annual Healthcare Effectiveness Data and Information Set (HEDIS) submission that is required by the Centers for Medicare & Medicaid Services.

Since Feb. 5, 2016, HealthMap Solutions has been gathering this information from providers who have rendered laboratory testing services primarily standalone and hospital labs. HealthMap Solutions sends those providers a Data Transmission Agreement Form. The form authorizes HealthMap Solutions to obtain copies of certain electronic medical records, including Hemoglobin A1c and nephropathy screening results for Amerigroup's diabetic members with a date of service 1/1/2015 and thereafter.

If you have any questions, please contact: Melissa Lauria at (614) 816-4223 or [Melissa.Lauria@Amerigroup.com](mailto:Melissa.Lauria@Amerigroup.com)
