

Amerigroup Washington, Inc. awarded Apple Health integrated managed care contract

Amerigroup Washington, Inc. was selected by the Washington State Health Care Authority to provide integrated managed care (IMC) and behavioral health expertise to Medicaid members residing in the Greater Columbia, Southwest Washington, Pierce, Okanogan and Spokane regional service areas beginning January 1, 2019. North Sound will go live on July 1, 2019. We were also selected to provide IMC benefits in the Salish, Great Rivers, and Thurston-Mason regional service areas, which will go live January 1, 2020. For King County, IMC benefits will be available to all Amerigroup members starting January 1, 2019, but, for King County members who need higher levels of behavioral health care, we have contracted exclusively with the King County Integrated Care Network to provide these levels of services. For the North Central region, IMC was implemented on January 1, 2018.

This contract is an extension of services we already provide to the Medicaid-eligible population in these areas. This will allow Amerigroup to coordinate IMC services as well as provide specialized value-added benefits. We look forward to continuing to partner with community providers and stakeholders to ensure the transition to IMC goes smoothly and members do not experience gaps in care. For more information about services offered by Amerigroup, please visit <https://providers.amerigroup.com/WA>.
