

Postponement and retraction notice

Postponed: musculoskeletal (MSK) program

On March 1, 2019, Amerigroup Washington, Inc. announced an expansion of the existing collaboration with AIM Specialty Health® (AIM). AIM planned to provide health services review for prior authorization of spine surgeries, joint surgeries and interventional pain management for members under the MSK program starting May 1, 2019. **This has been postponed until further notice for Apple Health members.** The program did go live January 1, 2019, for the Amerigroup Amerivantage (Medicare Advantage) members.

Retracted: transition of outpatient rehabilitation program

On February 27, 2019, Amerigroup announced that effective May 1, 2019, the outpatient rehabilitation Utilization Management program would be transitioning from Amerigroup to AIM. **This has been canceled and Amerigroup will not be making the transition.** We truly apologize for the confusion this may cause.

Please note that no further action is required for these updates.
